BEYOND THE BOTTLE

Exploring Australia's wine regions through grape varieties, production, value and climate

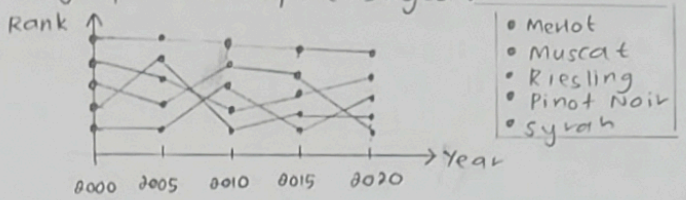

THE WINE LANDSCAPE

Before we compare regions, let's understand the broader shape of Australia's wine industry

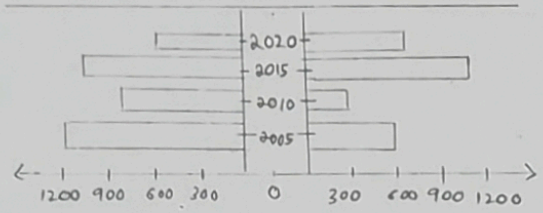

where is Australia's wine production concentrated.

How has Australia's grape landscape changed?

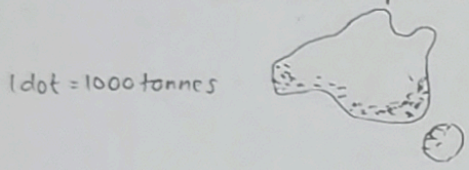

How does red winegrape production compare with white?

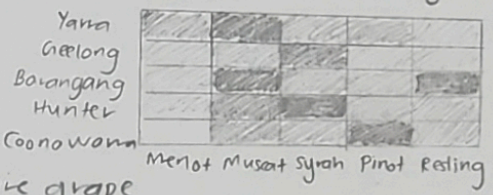

THE IDENTITY OF PLACE

The national picture hides distinct regional identities that shape Australian wine

which wine regions drive Australia's production?

which grapes define Australia's wine regions

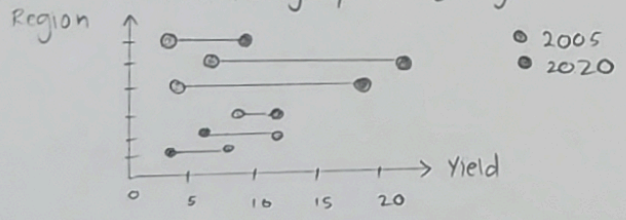

How concentrated are grape varieties within each region?

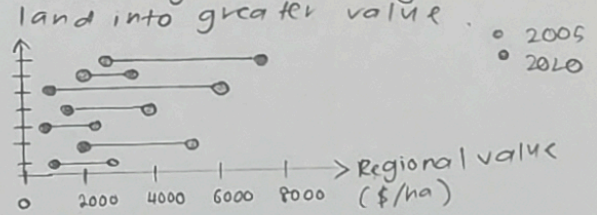

FROM GRAPES TO VALUE

Regional identity is not only visible in what vineyards grow. It also appears in productivity, price and economic value.

Do all wine regions turn land into grapes equally?

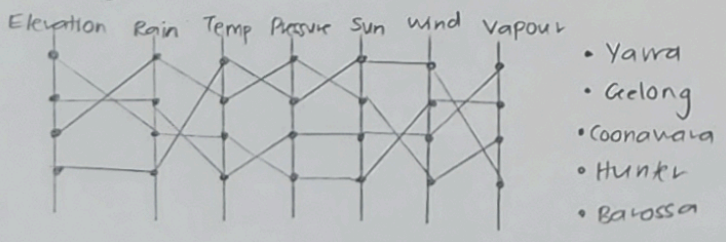

which regions turn vineyard land into greater value.

WINE IN A CHANGING CLIMATE

Different climates create different environments for Australia's vineyards.

what environmental conditions distinguish Australia's wine regions?

How has wine production in different climate conditions changed?
